BLACKMER ADDS SOAP & DETERGENTS SECTION TO WEB SITE

Grand Rapids, MI – Recognizing the ongoing growth in the production of soap and detergents, Blackmer, a Dover Company, and a global leader in the design and manufacture of positive displacement rotary vane, eccentric disc, centrifugal pump and compressor technologies, has added an informative and useful Soap & Detergents section to its Web site. Found at www.blackmer.com/ind-soap.jsp the information includes:

Blackmer's Soap & Detergents Pump Offerings

The various types of Blackmer pumps that are utilized in the production of soap and detergents are highlighted in this section. Among them are the ProVane® Motor Speed Vane Pump, System One® Heavy-Duty Centrifugal Pump, SNP Sliding Vane Pumps, SMVP Mag-Drive Sliding Vane Pumps, C-Series Eccentric Disc Pumps, Abaque Peristaltic (Hose) Pumps and Reciprocating Gas Compressors. All of this equipment conforms to the high standards established by Blackmer as the leading manufacturer of pumps and compressors for the soap and detergents industry.

Soap & Detergents Literature

Also included in the Soap & Detergents section of the Web site is literature that will assist users in understanding the specific applications that are ideal for Blackmer pumps. A full-color brochure is available for download as a PDF on the Web site. The brochure provides summary information on the many benefits of Blackmer pumps and includes a detailed illustration that gives readers a quick view of the entire industry. In addition to the brochure, users can download a PDF version of the latest white paper created by Blackmer specifically for the soap and detergents industry. The white paper, entitled "Blackmer C-Series Mouvex Principle Eccentric Disc Sealless Pump Technology," covers the key design features and benefits of the C-Series pump in soap and detergents applications.

Blackmer and Soap & Detergents Frequently Asked Questions

This offering in Blackmer's Soap & Detergents related online presence provides visitors with in-depth answers to common questions about Blackmer pumps and their application in the production of soap and detergents. Among the topics discussed are the materials of construction used in Blackmer pumps, which Blackmer pumps are ideal for installation in the saponification and hydrolysis continuous processes of soap and detergent manufacture, the benefits of Blackmer's sliding-vane technology, and which pumps handle surfactants, caustics, solids, perfumes, DI or RO water, gels, organic solvents and glycerin, all critical components found in the manufacture of soap and detergents.
